Honors & Fellowships

Quantitative Reasoning Fellowship, CUNY Graduate Center	2016–2017
Enhanced Chancellor’s Fellowship, CUNY Graduate Center	2012–present
Graduate Student Fellow, The Tobin Project (Cambridge, MA)	2015–2016
Research Praxis Fellowship, CUNY Advanced Research Collaborative	2015
Hyman P. Minsky Summer Seminar Fellow, Levy Economics Institute (Bard College)	2014
Scholarship, Institute for New Economic Thinking	2013
SVU Josef Hášek Award, Czechoslovak Society of Arts and Sciences	2007
Dean’s List, University of Chicago	2003–2006

Invited Talks

Applied Economics Seminar, CUNY Graduate Center
Tobin Graduate Student Forum, The Tobin Project

Sep 2016
Nov 2015

EXPERIENCE

Teaching

Lecturer: Fundamental Methods of Mathematical Economics, Brooklyn College 2014–2016
Volunteer: Bridge to Enter Advanced Mathematics (New York, NY) Fall 2016
Teaching Assistant: Principles of Macroeconomics, Brooklyn College Fall 2013

Research

Assistant: Prof's Thom Thurston and George Vachadze, CUNY Graduate Center 2012–2013
Assistant: Prof. Damon Jones, Harris School of Public Policy, University of Chicago 2011–2012
Assistant: Prof's Damon Jones and Aprajit Mahajan (Stanford), NBER 2010–2012

Professional

Economic Advisor: ofakind.com (New York, NY) 2010–present
Economist: American Society of Composers, Authors and Publishers (New York, NY) 2007–2012

THESIS ABSTRACT **Paper I:** “A Network Model of Wealth Inequality and Financial Instability” [Job Market Paper]

We propose a theoretical network model for understanding the relationship between wealth inequality and financial instability. Financial assets link individuals to form a network. Its topology varies with the level of wealth inequality and determines network stability in the event of an income shock. Simulations demonstrate that increasing wealth inequality, measured by the skewness of the financial network's degree distribution, makes the network less stable, measured by the share of individuals failing financially. Implications of the theoretical model are tested empirically on long-run panel data for nine countries with a reduced form, two-way fixed effects model. Estimates suggest that increasing wealth inequality, in an economy with high levels of aggregate wealth as measured by the wealth-income ratio, significantly increases the likelihood of financial crises, particularly stock market crashes. These results hold only for wealth, not income, inequality, suggesting an important role for the distribution of accumulated assets in macro-financial stability—and lending credibility to our financial network model of inequality and instability.

Paper II: “Instability, Credit, and Inequality in the United States Since 1913”

A methodological application of the cointegrated VAR model, we test multiple hypotheses concerning the long-run relationships between inequality, credit, and financial instability in the United States since 1913. The central role of abnormal credit growth in financial crises is well defined (e.g. Kindleberger and Minsky), thus we test if this relationship in fact holds statistically, and then expand the model to test if either income or wealth inequality is a long-run determinant of credit growth. A breadth of data is applied, and competing VAR systems tested, to bolster the apparent theoretical foundation of any statistical results.

Paper III: “Re-examining the Inequality and Growth Relationship: Evidence from CPS Reported Weekly Earnings Data”

Given inconsistent findings and the infeasibility of macroeconomic experiments, we propose an identification strategy that exploits reported household earnings in monthly CPS Basic surveys to study

the relationship between inequality and growth. We seek to study between-industry and occupation variation in earnings inequality and its subsequent impact on between-industry or occupation production growth rates. The monthly frequency of the data also enables us to explore further questions, such as the impact of specific financial deregulation legislation and China's entry into the World Trade Organization (WTO).
